PERSONAL PROJECTS

Human Computer Interaction Based Eye- Controlled Mouse (06/2020 - resent)

- As a Final year Project we are developing an Eye controlled mouse which will help amputees to interact with computer with the help of Python, OpenCV and many other Python Libraries.

Django E-commerce Website (04/2020 - 06/2020)

- Implemented Add to Cart and Price menu visibility within Ajax and JavaScript . I have created an E-commerce Website using Django in which javascript is used to dynamically add the contents using sqllite database .Also Integrated the Paytm gateway to make online transaction.

PHP Social Network Website (06/2020 - 08/2020)

- I have implemented a social networking website which is just like Instagram and was coded in PHP .In this website user can post , share ,comment and can also interact with each other through messages.

Food Waste Management Application (09/2019 - 11/2019)

- Our app fights food insecurity by connecting food donors with hunger relief organizations. The app targets anyone who wants to donate or receive food. .This was our third year project.
